ecobeco Delivers Savings through the Pepco Home Energy Savings Program

Rockville, MD (April 22, 2010) — EARTH DAY – Pepco has launched its Home Energy Savings Program as part of the EmPower Maryland initiative, which requires to reduce energy consumption in the state by 15 percent by the year 2015. The Pepco Home Energy Savings Program (<http://www.pepco.com/homeenergysavings>) consists of several programs designed to help customers reduce their energy usage through incentives and by to complete energy efficiency projects.

ecobeco has been designated as a participating contractor for Pepco's Home Performance with ENERGY STAR® program. Under this program, Pepco has provided an incentive for conducting a comprehensive Building Performance Institute (BPI) certified inspection, which reduces the cost of the audit to \$100. In this audit, ecobeco will provide Pepco customers with; an inspection of all their heating and cooling equipment; an air-leakage analysis using a blower door test; a series of combustion-related tests to assess the efficiency of gas appliances and any health or safety threats; improvements to be made to the home's air sealing and insulation, HVAC systems, appliances and lighting.

The Home Performance with ENERGY STAR® Audit program is open to current customers who receive distribution through Pepco Maryland. Customers must have electric heat and/or central air conditioning. The programs stated goal is to achieve 20 percent savings in every house assessed, which will help to reduce greenhouse gas emissions from power plants while improving the customer's comfort and life style. Customers will also receive 15% up to \$1,000 for making improvements to reduce air leakage or to augment insulation levels, and a \$200 subsidy for reducing duct leakage.

About Pepco

Pepco is a regulated electric utility that provides transmission and distribution services and is a wholly owned subsidiary of Pepco Holdings, Inc. (PHI). Pepco delivers electricity to more than 767,000 homes and businesses in the District of Columbia and its Maryland suburbs.
